PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with foundational knowledge of cybersecurity, networking, and web application security. Certified in Blue Team Fundamentals by Cyberwarfare Labs, with hands-on guided lab experience using Kali Linux, Nmap, Burp Suite, and Wireshark. Familiar with security monitoring, network analysis, and basic threat investigation. Seeking an entry-level opportunity in cybersecurity, SOC operations, or IT support to develop practical skills and contribute to security operations.

TECHNICAL SKILLS

Security Fundamentals: Cybersecurity Fundamentals, Network Security Fundamentals, Vulnerability Assessment Fundamentals, Penetration Testing Fundamentals, Web Application Security Fundamentals
Tools (used in guided labs): Kali Linux, Nmap, Burp Suite, Wireshark, Metasploit Framework
Practical Exposure: Guided Cybersecurity Labs, Network Scanning, Web Application Testing, Network Traffic Analysis
Defensive Security (Blue Team Fundamentals): Security Operations and Monitoring, Incident Response, SIEM Analysis, Threat Hunting, Digital Forensics

CERTIFICATIONS

Certified Cyber Security Analyst (C3SA) | Cyberwarfare Labs | Nov 2026
Credential ID: 6aeda68b206a82a1583fb6f8 | Verify Credential

- Covered domains: Network Security, Web Security, Vulnerability Assessment, Threat Detection, SOC Operations, Log Monitoring, Cloud Security, Security Hardening

Certified Blue Team Fundamentals (BTF) | Cyberwarfare Labs | Nov 2026
Credential ID: BTF-6ae9b105f88c7cc4d409fc1a

- Key areas: Security Operations and Monitoring, Threat Hunting and Intelligence, Incident Response, Digital Forensics, SIEM Analysis, Web, Network and Host Attack Investigation

PROJECTS

AI-Powered Smart Spectacles for the Visually Impaired | Academic Project
Technologies: YOLO, OpenCV, FaceNet, Dlib, Llama-2-7B, Ultrasonic Sensors, ToF Sensors

- Built an AI-enabled wearable system integrating YOLO, OpenCV, FaceNet, Dlib, Llama-2-7B, and ultrasonic and ToF sensors.
- Implemented real-time object and face recognition, obstacle detection, voice assistance, and location-aware audio feedback.

Intelligent Power Management Module (IPMM) | Academic Project
Technologies: ESP32, Supabase, React Native, Python, FastAPI

- Developed a full-stack IoT system using ESP32, Supabase, React Native, Python, and FastAPI.
- Delivered real-time energy monitoring, remote load control, and AI-based power consumption prediction.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science
Younus College of Engineering and Technology | Nov 2022 – Apr 2026

TRAINING AND WORKSHOPS

- Machine Learning and Artificial Intelligence, ICT Academy of Kerala (Monsoon Internship Program)
- Self Driving Electric Vehicles Workshop, Techmaghi in association with KSHITIJ, IIT Kharagpur

LANGUAGES

Malayalam, English, Tamil, Telugu
